Harish M

DevOps Engineer | Cloud Engineer

m.harish0705@gmail.com 8508754340 Vellore LinkedIn GitHub

SUMMARY

Aspiring DevOps and Cloud Engineer with hands-on experience building CI/CD pipelines, automating infrastructure, containerizing applications, and deploying cloud-native solutions using AWS, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Linux, and Python. Experienced in Infrastructure as Code (IaC), container orchestration, cloud provisioning, and deployment automation through multiple end-to-end DevOps projects. Strong understanding of CI/CD, cloud infrastructure, monitoring, and Linux administration. Seeking a DevOps Engineer, Cloud Engineer, Platform Engineer, or Site Reliability Engineer (SRE) role.

SKILLS

- **Cloud & AWS** — AWS (EC2, S3, IAM, VPC, Security Groups), Cloud Deployment
- **DevOps** — Git, GitHub, GitHub Actions, Jenkins, Docker, Kubernetes, Terraform, CI/CD
- **Networking** — TCP/IP, HTTP/HTTPS, DNS, SSH, Subnetting, VPC, Security Groups, Load Balancing
- **Operating systems** — Linux(Ubuntu), Bash Shell Scripting
- **Monitoring** — Prometheus, Grafana
- **Programming** — Python, SQL, YAML, HTML, CSS

PROJECTS

DevOps Task Manager
Technologies: Python • Flask • Docker • Kubernetes • Jenkins • Git • GitHub • SQLite

- Developed a cloud-native Task Manager application using Python and Flask, and containerized it with Docker for consistent deployments across development and production environments.
- Designed and implemented an automated CI/CD pipeline using GitHub, Jenkins, and Docker to automate source code checkout, Docker image builds, and application deployment.
- Deployed the application on Kubernetes using Deployments, Services, ConfigMaps, and kubectl, enabling scalable, reliable, and highly available deployments.
- Applied Infrastructure as Code (IaC) and container orchestration best practices to simplify deployment, improve maintainability, and reduce manual configuration.

End-to-End CI/CD Pipeline for HTML Application
Technologies: HTML • CSS • Docker • Jenkins • Terraform • AWS EC2 • Git • GitHub

- Designed and implemented an end-to-end CI/CD pipeline using GitHub, Jenkins, Docker, Terraform, and AWS EC2 to automate application build and deployment.
- Provisioned AWS cloud infrastructure using Terraform (Infrastructure as Code), including EC2 resources for automated deployments.
- Containerized the application using Docker to ensure consistent, portable, and repeatable deployment across environments.
- Automated build and deployment workflows with Jenkins, reducing manual deployment effort and improving release consistency.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science 08/2022 – 05/2025
K.M.G College of Arts and Science Gudiyatham, Vellore

Master of Computer Applications (MCA) 07/2025 – Pursuing
SRM Institute of Science and Technology Chennai

CERTIFICATIONS

- DevOps & Cloud Automation Virtual Internship - EduSkills | 2026
- AI-Powered Cloud Engineer Virtual Internship – AWS Educate / EduSkills | 2026
- Cloud Engineering Internship Certification – Unlox Academy| 2026
